👋 Hi! I'm a self-taught freelance/indie iOS Engineer. Here's a bit of what I've been working on.

# About

Instant payments between your friends and family  
Transferring funds is a breeze with W1TTY; just a few taps. You can rest assured that your money will always arrive in your friends' and family accounts around the world instantly.

## A few basic features

- physical & virtual debit cards
- users locations
- customer support
- instant payments
- multi-currency accounts
- cash rewards

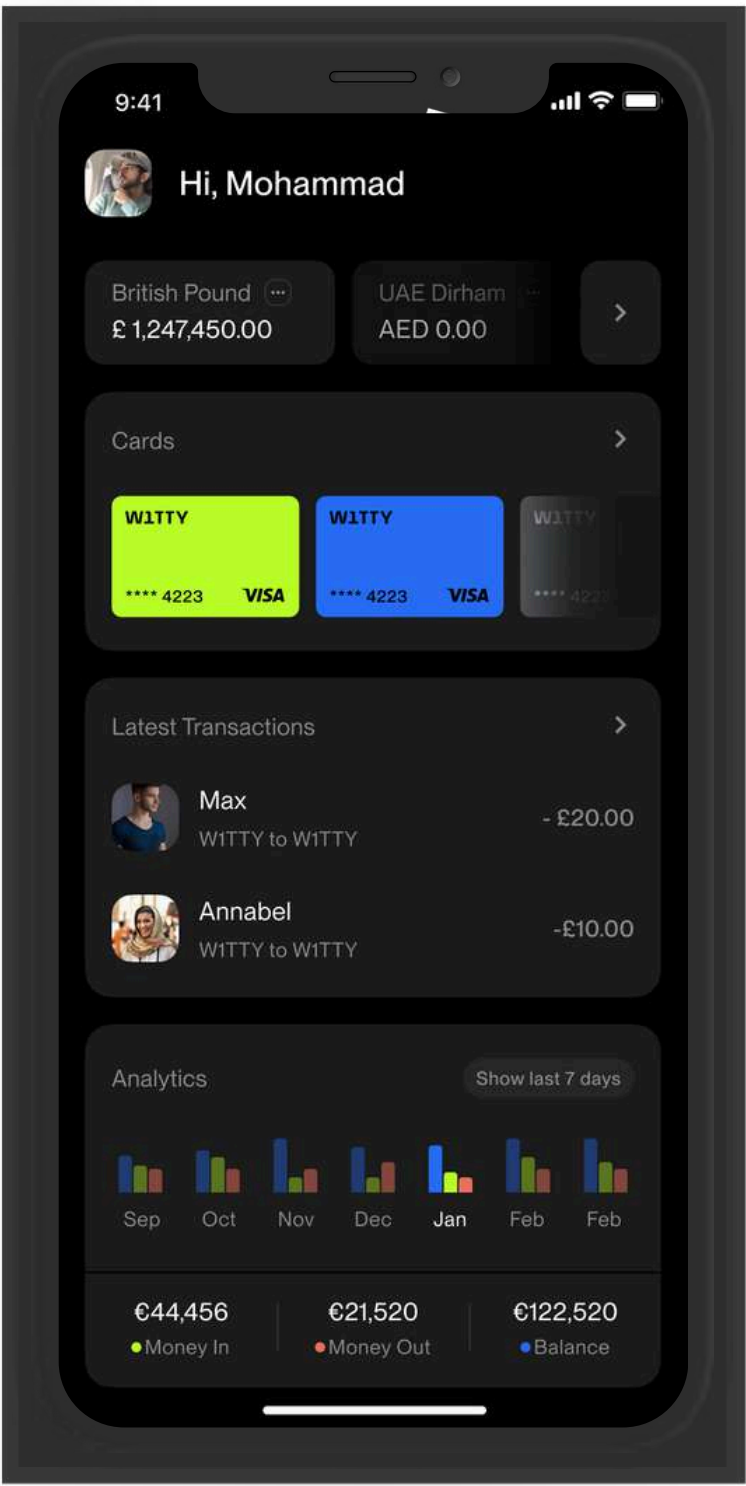

## Tech used

🚀 Platform iOS - 🎯 Clean Architecture - 🎨 Swift  
🏠 Firebase - 📺 API Integration
